Education

Chandigarh University 2021 – 2025
Bachelor of Engineering (CGPA: 7.8 / 10.0) *Mohali, Punjab*

Experience

Findoc Investmart Pvt Ltd Jul 2025 – Present
Software Developer *Gurgaon, Haryana*

- Developed and enhanced production-grade fintech web applications using React.js, JavaScript, HTML, and CSS, delivering responsive and user-centric interfaces.
- Built backend services using Python, Django, REST APIs, and SSO authentication for reporting and financial workflows.
- Optimized PostgreSQL queries and implemented reporting modules to improve data processing and application performance.
- Delivered new features, resolved production issues, and collaborated with Product, QA, and Design teams in an Agile environment.

Solar Secure Pvt Ltd Nov 2023 – Feb 2024
Software Developer Intern *Remote*

- Developed responsive web components using React.js, JavaScript, HTML, and CSS for production-ready applications.
- Improved application performance through code optimization, faster page loads, and cross-browser compatibility.
- Collaborated with designers and developers to implement scalable, user-centric interfaces and resolve frontend issues.

Worn In Well Aug 2023 – Oct 2023
Web Developer *Remote*

- Developed responsive web interfaces using HTML, CSS, and JavaScript from UI/UX design mockups.
- Built reusable components while improving responsiveness, performance, and cross-browser compatibility.
- Collaborated with the development team to implement new features and maintain a consistent user experience.

Projects

Findoc Wealth | *React.js, REST APIs*

- Developed a React.js-based mutual fund investment platform with REST API integration for portfolio and transaction management.
- Built reusable UI components and optimized application performance.

Findoc Vault | *Python, Django, PostgreSQL*

- Built a Django-based wealth management platform for portfolio tracking, reporting, and investment analytics.
- Developed secure backend services using Django and PostgreSQL.

RAG-Powered Chatbot | *React.js, LangChain, OpenAI*

- Built an AI-powered RAG chatbot for semantic news search using LangChain and OpenAI.
- Implemented vector search and caching for faster responses.
